## SCHEDULED MAINTENANCE

**Information concerning Scheduled Maintenance**  
The imminent necessity of a SCHEDULED MAINTENANCE service is indicated as follows:

- by a message indicating the remaining kilometres/miles or days before the service is required;
- by the software system used by an authorised Ferrari Network service centre to determine component wear.

**N.B.:** Disconnecting the battery for prolonged periods will interrupt the service time counter determining activation of the "service" indicator lamp. As a result, the ANNUAL MAINTENANCE must be performed at least once a year, even if the "service" indicator is not displayed or the mileage required for the subsequent service interval has not been reached.

The remaining interval before the service is required is indicated in kilometres/miles or days.

The driver may view service counter information on the left hand TFT display any time, regardless of when the next service is required.

We recommend checking the remaining mileage before the next service before starting a particularly long journey and/or subjecting the vehicle to particularly heavy use.

When necessary, have the following checked by an authorised Ferrari Network service centre:

- engine oil level
- engine coolant level
- brake and clutch fluid level
- tyre pressure and condition

### Mandatory road-worthiness and emissions testing

Legislation in many countries requires the vehicle to be subjected to additional testing regarding safety and/or environmental aspects (e.g. exhaust gas analysis). These tests must be conducted by a specifically authorised centre.

- The undersigned declares that he/she has accepted the terms and conditions of the FERRARI warranty outlined in this booklet and has inspected the vehicle and found it in a satisfactory condition.
